

days of receipt of the request that consultation is necessary and will provide a final determination within 60 calendar days. If NARA does not grant the waiver, NARA will furnish a full explanation of the reasons for its decision.

(b) *Waiver of new requirement for existing agency records center.* NARA will review the agency's waiver request and plan to bring the facility into compliance.

(1) NARA will approve the request and plan within 30 calendar days if NARA judges the planned actions and time frames for bringing the facility into compliance are reasonable.

(2) If NARA questions the feasibility or reasonableness of the plan, NARA will work with the agency to develop a revised plan that NARA can approve and the agency can implement. NARA may grant a short-term temporary waiver, not to exceed 180 calendar days, while the revised plan is under development.

(c) *Waiver of roof requirements for underground storage facilities.* NARA will normally grant the waiver and notify the requesting agency within 10 work days if the agency has not also requested a waiver of a different requirement under § 1228.236. If the agency has another waiver request pending for the same facility, NARA will respond to all of the waiver requests at the same time and within the longest time limits.

FACILITY APPROVAL AND INSPECTION REQUIREMENTS

§ 1228.240 How does an agency request authority to establish or relocate records storage facilities?

(a) *General policy.* Agencies are responsible for ensuring that records in their legal custody are stored in appropriate space as outlined in this subpart. Under § 1228.156(a), agencies are responsible for initiating action to remove records from space that does not meet these standards if deficiencies are not corrected within 6 months after initial discovery of the deficiencies by NARA or the agency and to complete removal of the records within 18 months after initial discovery of the deficiencies.

(1) *Agency records centers.* Agencies must obtain prior written approval from NARA before establishing or relo-

cating an agency records center. Each separate agency records center must be specifically approved by NARA prior to the transfer of any records to that individual facility. If an agency records center has been approved for the storage of Federal records of one agency, any other agency that proposes to store its records in that facility must still obtain NARA approval to do so.

(2) *Commercial records storage facilities.* An agency may contract for commercial records storage services. However, before any agency records are transferred to a commercial records storage facility, the transferring agency must ensure that the facility meets all of the requirements for an agency records storage facility set forth in this subpart and must submit the documentation required in paragraph (e) of this section.

(b) *Exclusions.* For purposes of this section, the term "agency records center" excludes NARA-owned and operated records centers. For purposes of this section and § 1228.244, the term "agency records center" also excludes agency records staging and/or holding areas with a capacity for containing less than 25,000 cubic feet of records. However, such records centers and areas, including records centers operated and maintained by NARA, must comply with the facility standards in §§ 1228.228 through 1228.232.

(c) *Contents of requests for agency records centers.* Requests for authority to establish or relocate an agency records center, or to use an agency records center operated by another agency, must be submitted in writing to the Director, Space and Security Management Division (NAS), National Archives and Records Administration, 8601 Adelphi Road, College Park, MD 20740-6001. The request must identify the specific facility and, for requests to establish or relocate the agency's own records center, document compliance with the standards in this subpart. Documentation requirements for § 1228.230(s) are specified in § 1228.242.

(d) *Approval of requests for agency records centers.* NARA will review the submitted documentation to ensure the facility demonstrates full compliance with the standards in this subpart. NARA reserves the right to visit the

facility, if necessary, to make the determination of compliance. NARA will inform the agency of its decision within 45 calendar days after the request is received, and will provide the agency information on the areas of noncompliance if the request is denied. Requests will be denied only if NARA determines that the facility does not demonstrate full compliance with the standards in this subpart. Approvals will be valid for a period of 10 years, unless the facility is materially changed before then or an agency or NARA inspection finds that the facility does not meet the standards in this subpart. Material changes require submission of a new request for NARA approval.

(e) *Documentation requirements for storing Federal records in commercial records storage facilities.* At least 45 calendar days before an agency first transfers records to a commercial records storage facility, the agency must submit documentation to NARA that the facility complies with the standards in this subpart. The documentation may take the form of a copy of the agency's contract that incorporates this subpart in its provisions or a statement from the agency records officer that certifies that the facility meets the standards in this subpart. An agency must provide the documentation for each separate commercial records storage facility where its records will be stored. Documentation must be sent to the Director, Space and Security Management Division (NAS), National Archives and Records Administration, 8601 Adelphi Road, College Park, MD 20740-6001. The agency must submit updated documentation to NARA every 10 years if it continues to store records in that commercial records storage facility.

[64 FR 67642, Dec. 2, 1999, as amended at 70 FR 50988, Aug. 29, 2005; 70 FR 55730, Sept. 23, 2005]

§ 1228.242 What does an agency have to do to certify a fire-safety detection and suppression system?

(a) *Content of documentation.* The agency must submit documentation to the Director, Space and Security Management Division (NAS), National Archives and Records Administration, 8601 Adelphi Road, College Park, MD

20740-6001, that describes the space being protected (e.g., the type and stacking height of the storage equipment used, or how the space is designed, controlled, and operated) and the characteristics of the fire-safety detection and suppression system used. The documentation must demonstrate how that system meets the requirement in § 1228.230(s) through:

(1) A statement that the facility is using a NARA certified system as described in Appendix B to this part;

(2) A report of the results of independent live fire testing (Factory Mutual, Underwriters Laboratories or Southwest Research Institute); or

(3) A report under seal of a licensed fire protection engineer that:

(i) Describes the design intent of the fire suppression system to limit the maximum anticipated loss in any single fire event involving a single ignition and no more than 8 fluid ounces of petroleum-type hydrocarbon accelerant (such as, for example, heptanes or gasoline) to a maximum of 300 cubic feet of Federal records destroyed by fire. The report need not predict a maximum single event loss at any specific number, but rather should describe the design intent of the fire suppression system. The report may make reasonable engineering and other assumptions such as that the fire department responds within XX minutes (the local fire department's average response time) and promptly commences suppression actions. In addition, any report prepared under this paragraph should assume that the accelerant is saturated in a cotton wick that is 3 inches in diameter and 6 inches long and sealed in a plastic bag and that the fire is started in an aisle at the face of a carton at floor level. Assumptions must be noted in the report;

(ii) Details the characteristics of the system; and

(iii) Describes the specific measures beyond the minimum features required by the applicable building code that have been incorporated to limit destruction of records. The report should make specific references to industry standards used in the design, such as those issued by the National Fire Protection Association, and any testing or
